

Stream and Leaf

Stream: the first digit(s)

Leaf → the last digit

ex:

Data: 12, 14, 15, 18, 21, 23, 25

Stream | Leaf

1 | 2, 4, 8,

2 | 1, 3, 5

Why it is used?

- To see the shape of data.
- To find smallest and largest values.
- Works well for small to medium datasets.

ex:

Datasets:

15, 27, 8, 12, 13, 22, 24, 25, 13, 36,
32, 32, 32, 28, 43, 7.

Stream	Leaf
0	7, 8
1	3, 3, 5, 7
2	2, 4, 5, 7, 8
3	2, 2, 2, 6
4	3

7, 8

13, 13, 15, 17

22, 24, 25, 27, 28

32, 32, 32, 36

43

ex 3:

Data set:-

72, 85, 89, 93, 88, 76, 108, 115, 97, 102

11.3.

$\leq$	L		
7	2	6	
8	5	8	9
9	3	7	
10	2	8	
11	3	5
