

⇒ Pie chart:

in categorical data, a pie chart is use for what?

→ A pie chart is used to show how each category is a part (percentage) of the whole. A pie chart tells us:

- How much each category contributes.
- Out of 100% who has what share.

Items	Expenditures	Angles of Sectors
Food	1200	$\frac{1200}{3000} \times 360 = 144^\circ$
House rent	1000	$\frac{1000}{3000} \times 360 = 120^\circ$
Clothing	500	$\frac{500}{3000} \times 360 = 60^\circ$
Education	300	$\frac{300}{3000} \times 360 = 36^\circ$
Total	3000	

Angle = $\frac{\text{component value}}{\text{whole quantity}} \times 360$
